COMMUNITY HEALTH COVENANT TABLE

One meeting, one shared record

Complete together. Use service details and agreed roles. Leave patient information out. Read the commitments back. Give residents a way to correct the record.

Date, convenor and person keeping the record

What do residents want to change? Who is missing from the conversation?

What do we know, what is uncertain and what would change our minds?

Who agreed to do what, with whose authority, time or funds, and by when?

What will show that access improved? Who was missed or carried a new burden?

Who can pause the work, hear a concern independently and arrange a remedy?

Next review date, decision and outstanding duties. How will residents hear back?
